Dear Mr. Furth:

In accordance with the provisions of the FCC approved Region 19 Plan Update Committee (RPUC) is submitting an amendment to its frequency allocation table for your approval. The Region 19 800MHz Planning Committee respectively requests a substitution of previously approved channels for Grand Isle, VT. Grand Isle, VT is in discussions with the rebanding Transition Administrator and has identified a combiner spacing issue. To resolve the combiner spacing issue Grand Isle, VT has requested a new frequency be issued. On April 8, 2009 Region 19 filed with the FCC the 800MHz NPSPAC Plan Amendment. Grand Isle, VT is reconfigured based on the FCC Order DA 08-1094, WT Docket 02-55 Second Report and Order adopted on May 9, 2008, which is affected by the Post Rebanding Plan – Canadian Border Region 2 which moves pre rebanding frequencies 17.4 MHz down. The requested changes have been reviewed and approved by adjacent Region 8 and 30 (copies of those approvals are enclosed). Identified below is the Grand Isle, VT streamlined allocation filing with the FCC.
